This book is presenting the truth behind the transistor, optical fiber, laser, and so many other elements that are now part of our daily activities, besides giving us the real information of where we came from and who is really protecting us in and out of Earth. Learn what the pyramids or the Nazca lines were for, or even how they were built, and by whom. Get to know about the Klemers (Grays) and the Humanity of the Galaxy. Holidays in Victorian England Gordon Thorburn 2012-07-19 In the country, holidaymakers were a rarity. The railways could take you almost anywhere, but it was only the middle classes who went. So there were no crowds, and many of our pictures show tourist hotspots before they were hot, before there was any such thing as a car park. The text provides local knowledge and background to the photographs and is an enjoyable read in itself, but the real pleasure is in seeing Brighton, Margate, Scarborough, Broadstairs, Clovelly, Ilfracombe, Minehead, before it all happened. See Exmoor, the White Peak, Somerset, when the loudest noise was the click of the camera shutter.

The GMO Deception Sheldon Krimsky 2014-06-03 Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

Slowly, Slowly in the Wind Patricia Highsmith 2004-12-17 "Highsmith's writing is wicked . . . it puts a spell on you, after which you feel altered, even tainted."—Entertainment Weekly Slowly, Slowly in the Wind brilliantly assembles many of Patricia Highsmith's most nuanced and psychologically suspenseful works. Rarely has an author articulated so well the hypocrisies of the Catholic Church while conveying the delusions of a writer's life and undermining the fantasy of suburban bliss. Each of these twelve pieces, like all great short fiction, is a crystal-clear snapshot of lives both static and full of chaos. In "The Pond" Highsmith explores the unforeseen calamities that can unalterably shatter a single woman's life, while "The Network" finds sinister loneliness and joy in the mundane yet engrossing friendships of a small community of urban dwellers. In this enduring and disturbing collection, Highsmith evokes the gravity and horror of her characters' surroundings with evenhanded prose and a detailed imagination.

Cuny Janssen: Whatever Works Cuny Janssen 2021-09-07 Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.

His black and white photography was visual poetry that captured emotion, attitude and luster one impromptu moment at a time. His camera and mind's eye sought out the truth of New York rooted in its inhabitants and their experiences. Mr. Fishman's black and white street photography encompasses the essence of many famous events and gatherings such as Wigstock, the Easter Hat Parade along 5th Avenue, Pryde and the Halloween Parade as well as everyday quality time around NYC.
