Marine protected areas: Food and Agriculture Organization of the United Nations 2018-11-09 Building on work presented at the IUCN World Parks Congress (WPC) held in Australia in 2014, this document outlines experiences with aquatic protected areas (PAs), marine protected areas (MPAs) and protected areas in inland waters in the context of livelihoods and food security. It provides a general overview of MPAs and reports on their interface with livelihoods and food security, based on case studies in Africa, Asia, Latin America and Oceania. It also synthesizes the papers conclusions and discusses the observed outcomes of aquatic PAs, together with problems and solutions.

Antibiotics and Bacterial Resistance Wiley 2013-01-14 The need for novel antibiotics is greater now than perhaps anytime since the pre-antibiotic era. Indeed, the recent collapse of many pharmaceutical antibacterial groups, combined with the emergence of hypervirulent and pan-antibiotic-resistant bacteria has severely compromised infection treatment options and led to dramatic increases in the incidence and severity of bacterial infections. This collection of reviews and laboratory protocols gives the reader an introduction to the causes of antibiotic resistance, the bacterial strains that pose the largest danger to humans (i.e., streptococci, pneumococci and enterococci) and the

antimicrobial agents used to combat infections with these organisms. Some new avenues that are being investigated for antibiotic development are also discussed. Such developments include the discovery of agents that inhibit bacterial RNA degradation, the bacterial ribosome, and structure-based approaches to antibiotic drug discovery. Two laboratory protocols are provided to illustrate different strategies for discovering new antibiotics. One is a bacterial growth inhibition assay to identify inhibitors of bacterial growth that specifically target conditionally essential enzymes in the pathway of interest. The other protocol is used to identify inhibitors of bacterial cell-to-cell signaling. This e-book — a curated collection from eLS, WIREs, and Current Protocols — offers a fantastic introduction to the field of antibiotics and antibiotic resistance for students or interdisciplinary collaborators. Starving the Exam Stress Gremlin Kate Collins-Donnelly 2017-10-19 Stressed out by exams? Then the exam stress gremlin is in town! Exam fears and worries are his favourite foods, and the more of these you feed him, the bigger he gets and the more stressed you become. But he can be stopped! Starve him of stress-related thoughts, feelings and behaviours and feel him and your stress fade away! Part of the award-winning Starve the Gremlin series and full of engaging activities, this self-help workbook explains what exam stress is, how it develops and the impact it can have - providing the reader with an understanding of their own exam stress.

Rooted in cognitive behavioural therapy, it is also bursting with strategies to help the reader manage their exam stress by changing how they think and act. Starving the Exam Stress Gremlin can be completed independently by young people aged 10+ or with supervision, and with exam stress on the rise among our young people, this invaluable resource will also be of interest to school counsellors, teaching staff, youth workers and social workers and parents.

Wind Vision U. S. Department U.S. Department of Energy 2015-03-18 This book provides a detailed roadmap of technical, economic, and institutional actions by the wind industry, the wind research community, and others to optimize wind's potential contribution to a cleaner, more reliable, low-carbon, domestic energy generation portfolio, utilizing U.S. manufacturing and a U.S. workforce. The roadmap is intended to be the

beginning of an evolving, collaborative, and necessarily dynamic process. It thus suggests an approach of continual updates at least every two years, informed by its analysis activities. Roadmap actions are identified in nine topical areas, introduced below.

How's Life? 2013 Collective 2014-07-31 Every person aspires to a good life. But what does "a good or a better life" mean? The second edition of How's Life? provides an update on the most important aspects that shape

people's lives and well-being: income, jobs, housing, health, work-life balance, education, social connections, civic engagement and governance, environment, personal security and subjective well-being. It paints a comprehensive picture of well-being in OECD countries and other major economies, by looking at people's material living conditions and quality of life across the population. Through a wide range of comparable well-being indicators, the report shows that countries perform differently in the various dimensions of well-being. For instance, low-income countries in the OECD area tend to do very well in subjective well-being and work-life balance, while their level of material well-being is much lower than that of other OECD countries. The report responds to the needs of citizens for better information on well-being and the needs of policy makers to give a more accurate picture of societal progress. In addition, the report contains in-depth studies of four key cross-cutting issues in well-being that are particularly relevant. First, this report analyses how well-being has changed during the global economic and financial crisis. Even though some effects of the crisis may become visible only in the long-term, the report finds that the Great Recession has large implications for both economic and non-economic well-being of households. Secondly, the report looks at gender differences in well-being, showing that the traditional gender gap in favour of men has reduced but has not disappeared. It also finds that women and men do well in different areas of well-being and that they are increasingly sharing tasks and roles. Third, it looks at the quality of employment and well-being in the workplace. The report presents evidence on the main factors that drive people's commitment at work and are key to strengthening their capacity to cope with demanding jobs. Finally, the last chapter of the report studies the links between current and future well-being. It looks at ways to define and measure sustainability of wellbeing over time. How's Life? is part of the OECD Better Life Initiative, launched by the Organization on the occasion of its 50th Anniversary in 2011. The OECD Better Life Initiative aims to promote "Better Policies for Better Lives", in line with the OECD's overarching... *IGCSE Biology* D G Mackean 2009 This highly respected and valued

Cambridge International AS and A Level Mathematics: Mechanics Coursebook Jan Dangerfield 2018-03-22 This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Mechanics matches the corresponding unit of the syllabus, with clear and logical progression through. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles, motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Public Health Consequences of E-Cigarettes National Academies of Sciences, Engineering, and Medicine 2018-05-18 Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to

develop on the health effects of e-cigarettes. *Public Health Consequences of E-Cigarettes* reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research.

How to Write a Good Scientific Paper CHRIS A. MACK 2018 Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

The Social Determinants of Mental Health Michael T. Compton 2015-04-01 *The Social Determinants of Mental Health* aims to fill the gap that exists in the psychiatric, scholarly, and policy-related literature on the social determinants of mental health: those factors stemming from where we learn, play, live, work, and age that impact our overall mental health and well-being. The editors and an impressive roster of chapter authors from diverse scholarly backgrounds provide detailed information on topics such as discrimination and social exclusion; adverse early life experiences; poor education; unemployment, underemployment, and job insecurity; income inequality, poverty, and neighborhood deprivation; food insecurity; poor housing quality and housing instability; adverse features of the built environment; and poor access to mental health care. This thought-provoking book offers many beneficial features for clinicians and public health professionals: Clinical vignettes are included, designed to make the content accessible to readers who are primarily clinicians and also to demonstrate the practical, individual-level applicability of the subject matter for those who typically work at the public health, population, and/or policy level. Policy implications are discussed throughout, designed to make the content accessible to readers who work primarily at the public health or population level and also to demonstrate the policy relevance of the subject matter for those who typically work at the clinical level. All chapters include five to six key points that focus on the most important content, helping to both prepare the reader with a brief overview of the chapter's main points and reinforce the "take-away" messages afterward. In addition to the main body of the book, which focuses on selected individual social determinants of mental health, the volume includes an in-depth overview that summarizes the editors' and their colleagues' conceptualization, as well as a final chapter coauthored by Dr. David Satcher, 16th Surgeon General of the United States, that serves as a "Call to Action," offering specific actions that can be taken by both clinicians and policymakers to address the social determinants of mental health. The editors have succeeded in the difficult task of balancing the individual/clinical/patient perspective and the population/public health/community point of view,

while underscoring the need for both groups to work in a unified way to address the inequities in twenty-first century America. The Social Determinants of Mental Health gives readers the tools to understand and act to improve mental health and reduce risk for mental illnesses for individuals and communities. Students preparing for the Medical College Admission Test (MCAT) will also benefit from this book, as the MCAT in 2015 will test applicants' knowledge of social determinants of health. The social determinants of mental health are not distinct from the social determinants of physical health, although they deserve special emphasis given the prevalence and burden of poor mental health.

Issues in Science and Theology: Do Emotions Shape the World? Dirk Evers 2016-04-14 This volume examines emotions and emotional well-being from a rich variety of theological, philosophical and scientific and therapeutic perspectives. To experience emotion is a part of being human; but what are emotions? How can theology, philosophy and the natural sciences unpack the nature and content of emotions? This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi, Italy. It brings together contributions from scholars of various academic backgrounds from around the world, whose individual insights are made all the richer by their juxtaposition with those from experts in other fields, leading to a unique exchange of ideas.

The Leading Edge of Early Childhood Education Nonie K. Lesaux 2021-02-23 The Leading Edge of Early Childhood Education aims to support the effort to simultaneously scale up and improve the quality of early childhood education by bringing together relevant insights from emerging research to provide guidance for this critical, fledgling field. It reflects the growing recognition that early childhood experiences have a powerful effect on children's later academic achievement and long-term life outcomes. Editors Nonie K. Lesaux and Stephanie M. Jones bring

together an impressive array of scholarly contributors. Topics include: · creating learning environments that support children's cognitive and emotional development; · identifying and addressing early risk factors; · using data to guide educators' practice; and · capitalizing on the use of technology. Recent years have seen a surge of local, state, and national initiatives aimed at expanding and improving early childhood initiatives, particularly regarding access to preK programs. The Leading Edge of Early Childhood Education promises to be a valuable resource for those charged with enacting the next level of work in this critical area.

Sustainable healthy diets Food and Agriculture Organization of the United Nations 2019-10-15 Considering the detrimental environmental impact of current food systems, and the concerns raised about their sustainability, there is an urgent need to promote diets that are healthy and have low environmental impacts. These diets also need to be socio-culturally acceptable and economically accessible for all. Acknowledging the existence of diverging views on the concepts of sustainable diets and

healthy diets, countries have requested guidance from the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) on what constitutes sustainable healthy diets. These guiding principles take a holistic approach to diets; they consider international nutrition recommendations; the environmental cost of food production and consumption; and the adaptability to local social, cultural and economic contexts. This publication aims to support the efforts of countries as they work to transform food systems to deliver on sustainable healthy diets, contributing to the achievement of the SDGs at country level, especially Goals 1 (No Poverty), 2 (Zero Hunger), 3 (Good Health and Well-Being), 4 (Quality Education), 5 (Gender Equality) and 12 (Responsible Consumption and Production) and 13 (Climate Action).

Biology and Management of Weeds and Invasive Plants Bruce Ackley 2015-12-29 This book provides information on the basic principles of weed science. It describes 46 families and 100 species of monocotyledonous and dicotyledonous plants. Plant descriptions include key identification characteristics, pictures of the various species at different stages of maturity, and 360-degree movies for most species. This book includes a number of the most common Midwestern U.S. weeds and basic intellectual tools that are necessary to successfully identify plants. Furthermore it provides an introduction or "first exposure" to some basic weed control measures along with offering a basic scientific explanation of how and why various control measures work.

Understanding Proto-insurgencies Daniel Byman 2007 This study examines how terrorist groups transition to insurgencies and identifies ways to combat proto-insurgents. It describes the steps groups must take to gain the size and capabilities of insurgencies, the role of outside state support, and actions governments can take to prevent potential insurgencies from blossoming. The most effective U.S. counterinsurgency action would be to anticipate the possibility of insurgencies developing; it could then provide training and advisory programs and inhibit outside support.
