How To Watch Television Ethan Thompson 2013-09-16 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it "good" or "bad." Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.

The "People Power" Job Superbook Book 10: Media-Journalism Career (Journalism Jobs-Schools, Worldwide Media Guide) Tony Kelbrat 2013-12-22 In general, communications is considered a glamor industry because of the creativity involved so competition is fierce, even for people with advanced degrees. I've known several people with journalism degrees who couldn't find a job so they ended up as high school teachers or something like that. It's all about your ability with words. Newscasts have to be written everyday. They have to have fresh, new, exciting, crisp stories. It takes a certain pragmatic skill to write good news copy quickly. If you can get a story, summarize it down into your own words very quickly, edit news footage to go with it to create a quick story on the nightly newscast, you will easily be in demand because these skills are rather rare. People who do these jobs often get tired of the stress involved and quit. On the other hand, I heard of one talk show host who had two jobs in different cities. He did his morning talk show, took a plane to the other city 150 miles away, did his evening show

The Flip Side of Free Michael Kende 2021-03-09 Why "free" comes at a price: the costs of free internet services in terms of privacy, cybersecurity, and the growing market power of technology giants. The upside of the internet is free Wi-Fi at Starbucks, Facetime over long distances, and nearly unlimited data for downloading or streaming. The downside is that our data goes to companies that use it to make money, our financial information is exposed to hackers, and the market power of technology companies continues to increase. In The Flip Side of Free, Michael Kende shows that free internet comes at a price. We're beginning to realize this. Our all-purpose techno-caveat is "I love my smart speaker...but"--is it really tracking everything I do? listening to everything I say?

A Wilderness of Error Errol Morris 2014-01-22 Soon to be an FX Docuseries from Emmy® Award-Winning Producer Marc Smerling (The Jinx) featuring the author Errol Morris! Academy Award–winning filmmaker Errol Morris examines one of the most notorious and mysterious murder trials of the twentieth century In this profoundly original meditation on truth and the justice system, Errol Morris—a former private detective and director of The Thin Blue Line—delves deeply into the infamous Jeffrey MacDonald murder case. MacDonald, whose pregnant wife and two young daughters were brutally murdered in 1970, was convicted of the killings in 1979 and remains in prison today. The culmination of an investigation spanning over twenty years and a masterly reinvention of the true-crime thriller, A Wilderness of Error is a shocking book because it shows that everything we have been told about the case is deeply unreliable and that crucial elements of case against MacDonald are simply not true.

Locating Television Anna Cristina Pertierra 2013 Locating Television: Zones of Consumption takes an important next step for television studies: it acknowledges the growing diversity of the international experience of television today in order to address the question of 'what is television now?' The book addresses this question in two interrelated ways: by situating the consumption of television within the full range of structures, patterns and practices of everyday life; and by retrieving the importance of location as fundamental to these structures, patterns and practices – and, consequently, to the experience of television. This approach, involving collaboration between authors from cultural studies and cultural anthropology, offers new ways of studying the consumption of television – in particular, the use of the notion of 'zones of consumption' as a new means of locating television within the full range of its spatial, temporal, cultural, political and industrial contexts. Although the study draws its examples from a wide range of locations (the US, the UK, Australia, Malaysia, Cuba, and the Chinese language markets in Asia - -Hong Kong, Singapore, China and Taiwan), its argument is strongly informed by the evidence and the insights which emerged from ethnographic research in Mexico. This research site serves a strategic purpose: by working on a location with a highly developed and commercially successful transnational television industry, but which is not among the locations usually considered by television studies written in English, the limitations to some of the assumptions underlying the orthodoxies in Anglo-American television studies are highlighted. Suitable for both upper level students and researchers, this book is a valuable and original contribution to television, media and cultural studies, and anthropology, presenting approaches and evidence that are new to the field.
